

# Type 80 Folding Partition

The Type 80 system is our Sliding, Folding Partition, that offers good levels of sound reduction at an economical price. Folding Partitions allow clients to effectively and efficiently divide a multitude of areas, offering a versatile solution to the often complex problem of space management.

The system consists of continuously hinged together panels and are designed for use when a soffit/ceiling head fixing is restricted or not possible, or where a speedy change to the room layout is required.
